

GLOBAL RISK MANAGEMENT INSTITUTE
RISK EDUCATORS PVT. LTD.

Hi

Thank you for showing interest in our 1 year PGDRM programme-Post Graduate Diploma in Risk Management. Kindly refer the frequently asked questions below:

About PGDRM

1) What is PGDRM?

PGDRM-Post Graduate Diploma in Risk Management is a 1 year full time on-campus specialisation course which covers all aspects of Risk Management.

It include **3 papers on general management topics** and **14 technical papers on various facets of Risk Management**, such as Enterprise Risk Management ('ERM'), Internal Audit ('IA'), Sarbanes Oxley and Internal Financial Controls, Regulatory Compliance, Financial Risk Management, Applied Audit Analytics, Information Technology General Controls ('ITGC'), Third Party Risk Management (TPRM),m etc.

The 3 general management papers will focus on enhancing awareness of corporate reality and creating more well-rounded risk professionals of the future. These will include Strategic Thinking, Fundamentals of Human Resource Management, and Organizational Behaviour.

2) What is the scope of PGDRM??

Since PGDRM is 1 year programme, it gives you an edge in comparison with 2 year programmes. A significant number of instructors are from the corporate world, who bring with them the depth of domain knowledge critical for delivering a specialized curriculum, differentiated from generic qualifications.

With GRMI, we offer a unique opportunity to our students to get skilled in specialized skillsets that make them ready for guaranteed value addition business roles.

Our course delivery is significantly based on Live Case Study pattern. These case studies are developed in discussion with CXOs of Fortune 500 companies across the globe. An enviable mix of Corporate Leaders and Leading Academia delivers the content ensuring knowledge sharing through practical corporate example sharing.

This gears up our students with right understanding of the concepts and application of same in practical world. PGDRM being a 1 year full time course, it gets you ready for entering the corporate world fully prepared for best of business roles and that to at least an year earlier as compared to any regular masters.

If you are looking to have a fast paced dynamic career, with extensive opportunity to learn and contribute to the success of an organization, then you should explore a career in Risk Management. If you like problem solving, approaching problems with an analytical approach and contribute in enhancing organization performance, then you are the right candidate for this.

Risk Management opens up *global opportunities to work across industries* like consulting, manufacturing, services etc. and key business processes like – finance, treasury, operations, supply chain, compliance, controllership, HR etc.

As our experience serves us, people with passion to learn, good analytical skills, a logical thinking process, ability to understand business and great communication skills have transformed into extremely successful Risk Management professionals.

3) What is the difference between PGDRM and MBA??

The world is moving towards specialization.

We believe, PGDRM from GRMI should be looked as an alternate to Masters. It's a full time one year class room education program with cutting edge curriculum and extensive infusion of live case studies, to give students a more practical experience.

In addition to specific Risk Management papers, we are also focusing on all round development of our students, and hand-picked key other subject papers like HR, Organization Behaviour, Cyber Risk and Strategic Thinking, which will benefit our students in their corporate careers. We have also embedded as part of our student development program a unique "Communication & Cultural Enhancement Module" that will be run through the year with an extremely personalized delivery. This will be aimed at improving each individual student on the two parameters of communication and cultural awareness, both are key for a successful global professional. Our endeavour at GRMI is to build an ecosystem for Risk Professionals. In doing this we are getting consulting organization, industry houses and aspiring risk professionals at a common platform to explore working for and with best in Risk Management space.

Our discussions with risk-consulting and corporate leaders have indicated that deep domain and all-round development that will be delivered at GRMI through the PGDRM program is almost certainly going to mean faster career tracks for PGDRM students, as compared to their peers who join with more generic qualifications. This will hold true for all professionals pursuing a career in the domain of risk, compliance, controllership and internal audits.

4) What makes GRMI different from other institutes??

In current market scenario, the one thing which can easily be termed as our USP is the placement opportunities for all our students, to serve a USD 40 B+ market growing at a steady pace, however, we believe that's an end product that we are committed to deliver, and not really our USP.

Our USP is the cutting edge course curriculum delivered by an enviable mix of corporate and academia leaders through case studies developed by CXOs of Fortune 500 companies. All this with the support of corporate world leaders, who believe in creating an ecosystem for risk professionals with us

5) What is the eligibility criteria for 1 year PGDRM programme?

Candidate with **minimum 50% in graduation** (any discipline) with or without work experience (0-4 years) and interest in Risk Management can apply for this course.

6) Is there any placement and internship guarantee??

Guaranteed Placement assistance will be provided to all students who meet the necessary criteria for placements.

The necessary qualifying criteria in terms of attendance in class (80% in each subject), CGPA score cut off (CGPA 6.0 in each subject), clean disciplinary track record would all be pre-published to all students and performance against the same would be published ahead of the start of the placement season so that there is complete transparency and no scope for interpretation.
