

MASTERCLASS SERIES

# DE-RISKING STRATEGY

# De-Risking Strategy

## MASTERCLASS SERIES

10th - 11th June'22 , 17th - 18th June'22 (Online)

Covid pandemic and the disruption caused has thrown series of challenges to businesses and their leaders alike. FICCI has put together a series of MasterClass to address issues which call for the urgent attention in the post-COVID scenario when the organizations try addressing their medium to long-term challenges. Having identified three major areas that need managerial expertise to help organizations to scale the challenges that they would need to grapple with, we invite you to these unique immersive and learning platforms in order to be prepared to face them with grit.

FICCI Masterclass Series is a set of e-training programmes which aim to equip senior executives, managers and professionals from across the industry with the necessary tools, techniques and strategies to take up the challenges of the emerging business scenario in the post Covid phase.

### FICCI Masterclass Series will help participants:

- 1 Gain insights into the latest models and frameworks for understanding and identifying Business Risks and Problems .
- 2 Leverage digital transformation to create competitive advantage
- 3 Identify opportunities amid challenges and develop strategies to capitalize on them
- 4 Stay current with the latest thought leadership, business insights and also build new capabilities

The learning experience will be very intensive and interactive with a combination of workshop sessions, practical case studies & exercises and engagement of participants in activities to embed the learning being delivered by thought leaders or subject experts from both India and abroad.

The sudden and widespread impact of the event has exposed organizations and their business models to considerable risks. The most agile of the organizations would need to be alert and cautious to the possible scenarios where they are likely to face complex and even existential threats. The continuity of the business cycle needs to be ensured and a foolproof way of operations deployed which insulate the organizations and its processes to the dangers of all kinds of risks. How can we be proactively prepared to prevent ourselves from such imminent risks?
